Features

Android Performance.

The MT67 Sei II operates on the Android 15 GMS AER operating system. It boasts all the features and benefits of Android 15, powered by an octa-core processor running at 2.0 GHz for high performance. With 4GB of RAM, it can effortlessly run multiple applications simultaneously, while its 64GB of flash memory allows for considerable offline storage of data. These features combine to make the device a powerful mobile computer, ensuring smoother operation.

High-Performance Scanning.

The MT67 Sei II features Megapixel 2D scanning technology, allowing for high-performance scanning of both 1D barcodes and 2D codes. This advanced technology, combined with the laser aimer, enables the MT67 to read even low-quality barcodes, including those that are damaged, distorted, or displayed in close proximity to each other.

Rugged Mobility Solution.

The MT67 Sei II is specifically designed for industries such as retail, logistics, and warehousing, among others. With its optional ergonomic pistol grip, IP67 rating, and ability to withstand a 1.5-meter drop onto concrete (or 1.8 meters with the protective case), this rugged and durable mobile computer is ready for any situation.

Style and comfort.

The design of the MT67 Sei II is well-balanced in weight, and its soft, curved edges enhance user comfort. The 4-inch capacitive full-color touchscreen presents sharp images and clear text. With two scan triggers on each side of the device and a side power button, the MT67 Sei II is suitable for both left and right-handed users, providing added comfort.

Wireless Technologies.

The device utilizes dual-band Wi-Fi for standard wireless communication, while its 4G capability enables connectivity beyond the network. Additionally, Bluetooth 5.0 is available for pairing with peripherals such as headsets, portable printers, and extra barcode scanners, e.g., from our Nwear Range.

Hot-Swappable Battery.

The MT67 Sei II features a USB-C interface and supports fast charging. Its 4,800 mAh battery allows for hot-swappable replacement and can be fully charged within 3 hours. This ensures no downtime and maximum efficiency throughout the entire shift.

Android Enterprise Recommended (AER).

The MT67 Sei II carries Google's AER seal of approval, signaling it keeps pace with performance and security upgrades to its operating system and core functionality. This label, in combination with Newland's free MDM Ndevor, enables clients to maintain secure visibility and control over their devices regardless of location.
