

FROM DOCK TO DOOR

The MT95 Kambur Pro in Action in Logistics and Warehousing

Did you know the MT95 Kambur Pro is going the extra mile in logistics? ON TIME Logistics from the Benelux region uses the mobile computer for capturing data at the docks, preparing shipments in distribution centers and for scanning parcels at last-mile delivery.

Challenges

- Robust device for daily logistic activities
- Finding a good service solution
- Compatible with custom software

Results

- Extended warranty and service contract
- Compatibility with custom applications
- Seamless operations from dock and customs applications to last-mile delivery

Consideration Points

- Powerful scan engine
- Strong and stable wireless connectivity (5G & WiFi Dual Band)
- 6.1" screen size
- 13 megapixel camera for proof of delivery
- Long lasting battery of 6000mAh
