

THE PROOF IS IN THE PARKING

Weatherproof Parking Efficiency with Newland's FM3281 Grouper

Parking systems require reliable and rugged hardware to function seamlessly in all environments. Recognizing this need, Meypar, a Spanish manufacturer of advanced parking machinery and part of the Oliva Torras Grup, sought a universal scanning solution for diverse parking conditions. To address this, they partnered with Send@, a Spanish IT distribution company founded in 1999 and a long-standing partner of Newland AIDC EMEA. Send@ recommended the Newland FM3281 Grouper, a fixed-mount scanner, as the ideal solution for Meypar's parking systems.

Challenges

- Exposure to sun, rain, and temperature changes affected scanner performance.
- Need for a single scanner type that could be used both outdoors and indoors.

Results

- FM3281 Grouper performed reliably in all weather conditions, solving the problem.
- Devices now operate smoothly in outdoor parking lots across Spain.

Consideration Points and Features

- IP67-rating for water and dust resistance.
- Designed for harsh environments – suitable for outdoor use.
