

# DON'T SWEAT IT — A WORKOUT IN LOGISTICS

## The MT90 Orca for Teaching Logistics at the Nike Logistics Innovation & Training Center

The Nike Logistics Innovation & Training Center (LITC) introduces high school and college students to the world of logistics, innovation, and sustainability. Here, students learn how Nike operates its sustainable logistics and supply chain management approach. Students also participate in a hands-on, realistic warehouse and logistics simulation game. Where they previously used pen and paper, LITC has now taken steps to digitize the game and has chosen the robust MT90 Orca mobile barcode scanner to do so.

### Challenges

- Going from paper to digital
- Sturdy device to handle inexperienced users
- Finding a fitting, accessible device for this particular project

### Results

- Accurate simulation game
- Real WMS experience for students
- Easy to manage devices with service and support

### Consideration Points and Features

- Robust design
- Smartphone look and feel
- Powerful scan engine
